Fractured Fairy Tale

Task: Identify character, problem and solution from any fairy tale

Process: For the following activity you are going to:
- Identify a character from a fairy tale we have read in class.
- Next you will need to think of a problem he or she had in the story.
- Once you have thought of the problem you need to think of how it was solved.
- When you have got that in mind you need to write each part on a separate cloud for your project.
- Once you have done that you need to repeat the whole process using a different character, problem and solution.
- You need to complete at least 5 fairy tales.
- Make sure to assemble the clouds for the final flipbook.
- Keep all the separate sections together in order to be stapled.
- Have fun sharing your fractured tales with friends!
