

Pollster's Task #8: Journal Question #2 Rubric

Criteria	1 pt.	2 pts.	3 pts.	4 pts.
Normal Approximation versus the Binomial Distribution	Did not describe characteristics of the Normal Approximation and the Binomial Distribution	Described the characteristics of either the Normal Approximation or the Binomial Distribution, but not both	Described the characteristics of the Normal Approximation and the Binomial Distribution, but missing a few details	Described the characteristics of both the Normal Approximation and the Binomial Distribution
Using Relevant Information to make informed decisions	Did not describe how to use relevant information to decide between the Normal Approximation and the Binomial Distribution	Attempted to describe how to use relevant information to decide between the Normal Approximation and the Binomial Distribution, but description was not accurate	Described how to use relevant information to decide between the Normal Approximation and the Binomial Distribution, but description was incomplete	Fully described how to use relevant information to decide between the Normal Approximation and the Binomial Distribution
Effectively communicated explanation	Explanation was not clearly communicated, difficult to follow	Explanation was easy to follow and effectively communicated	_____	_____
