Your cartographer boss, Mr. G. O’Graphy, wants you to know that the mayor has received scale maps of a fief from the “Friends of Fiefdom” and the “Fief Fighters.” Mr. O’Graphy needs you to use your knowledge and expertise to review a map to make sure it is structurally and mathematically correct. No one in the office knows more about the structures of a fief than you. Your boss needs you to review the map and offer any suggestions for improvement.

The mayor feels he has to present these maps at the upcoming city council meeting, in addition to the map you created, to give more than one option of what Naperville would look like as a fief. The mayor does not want to be accused of dismissing the idea without giving it a fair chance. The mayor also does not want to present a map that is factually or mathematically incorrect. He worries he might be accused of tampering with the map in order to help one of the two sides.

Criteria used to assess this task:
- Offer comments and suggestions on rough draft.
- Fix mathematical errors on rough draft.
- Fix structural errors of map.
- Fix factual errors of map.
- Write initials on all blanks where item is present.
- Circle all blanks where item is missing.
- Place signature on the bottom of the checklist.

See attached rubric for a detailed breakdown of points!
