

“A Collage of Math” Project

This is a required project! You are to complete this project individually. You will make a collage of math items. You may choose these items from magazines, newspapers, advertisements, etc. Please use the following guidelines in preparing your project.

Requirements for “A Collage of Math”

1. Use a piece of tag board, which will be provided to you, as your backing to your collage.
2. Choose at least 15 different items related to mathematics from magazines, newspapers, etc. Cut the items out and paste them to your tag board. The collage calls for no gaps between or around the items in the collage.
3. Number each item on your collage. On a separate sheet of paper, identify each item in the collage, and write an explanation of each item's relationship to mathematics. Attach this sheet to your collage.
4. You will also be required to choose at least 5 of the items in your collage and write a story problem related to each item. Provide the solution and an explanation for how to solve each problem. Please write these on a separate sheet of paper.
5. Please use complete sentences, proper grammar, spelling and punctuation.
6. On the back of your collage write your name, date and class period.
7. Evaluate your own collage by using the included rubric.
