

Algebra One
"Fireworks" Task #11
Period:

Name:
Date:

Process Standards:

Students will be able to:

- Interpret results in ways that are meaningful for the given context.
- Effectively communicate their mathematical knowledge.
- Identify errors and their work and revise when necessary.
- Organize class materials so that they are easily accessible and able to be used as an additional resource in problem solving situations.
- Accurately reflect on their progress and use their reflection to develop goals and design strategies that will aid in their improvement.

You will evaluate your quiz and write a reflection based on the mistakes you have made. You are also to revise the incorrect answers based on the comments I have made. Make sure to include the following:

- The original problem
- The correct solution with all necessary work shown
- A written explanation that describes your mistake and why you corrected it
