This project was created to assess second grade students in the area of reading at the end of a non-fiction unit. I used the Common Core State Standards and Naperville Unit School District 203’s reporting standards to develop this collection of authentic assessments. These standards are clear, observable, and measurable. After identifying the standards, I created meaningful tasks to assess students in multiple and varied ways to determine mastery of the standards. For each task, I have provided a description of the task, a list of materials needed to complete the task, and the directions for each task. All tasks will be completed independently by students. For each task, I have determined criteria that align to the task and therefore the standard. The criteria are included in the rubrics that are attached to each task. The rubrics are to be used to assess student performance on each task and standard.
