Drug Crossword Puzzle (Lab Work)

Content Standards

Students will…

3) Show respect for other students.

Process Standards

Students will…

1) Organize facts according to their descriptions.
2) Present information through various techniques.

Task

Using puzzlemaker.com, you will create a crossword puzzle of the drug classification that is assigned to your group of 3. You must include a title, decide which 10 terms you want to include, and the correct definition to each term. You may use your book or any notes to get the terms and definitions. You will provide me with an answer key since this puzzle will serve as a study guide for the exam.

Criteria

- Title – which is the classification you have
- 10 or more items – Your group needs to decide which information is the most important for the class to know. You will have 10 items but it certainly can be more!
- Correct definition to term – Make sure your term and definition match up and is clear for your classmates to understand
- Answer key
- No spelling errors
