Attached is an outline of tasks for the first unit of geometry, which covers patterns, basic geometric figures, and an introduction to logic and proofs. In order you will find:

- Standards
- 7 Summative Assessments
  - Partner Pattern Critique
  - Partner Counterexample
  - Conditional Statements Creation
  - Logical Argument Story
  - Real World Geometric Figures
  - Real World Algebraic Examples
  - Partner Proofs and Counterexamples
- 6 Formative assessments that build 'effectively critiquing the work of others' by breaking down the components of the standard and separately assessing the student on each.
