Task #1

Passport

Students will make a passport that they will fill with information from their classmates. The passport will contain the same number of pages as the number of students in class. Each passport will contain information on each student in class (minus one page for owner of passport). Each student must interview classmates, enter (write) information on student pages, and get a sticker from each student interviewed. When passport information gathered is finished, students will decorate the covers of their passports.

The information to be gathered includes favorite color, favorite thing to do (activity), favorite food, and favorite place. Other information may be added by the students at their choosing.

The object of this task is to help students get to know each other, learn how to gather information through interview questions, and practice writing skills.
